DIDSBURY, ALBERTA, THURSDAY, JULY 15, 1937

\$2.00 per Year. 5 Cents a Copy

## Didsbury Fair Wednesday July 28

Final arrangements were made for the Didsbury Fair at a meeting of the directors held on Tuesday afternoon.

From all indications there will be a large exhibit of livestock and the Government has informed the secretary that it will supply three judges, one for horses and one each for beef and dairy cattle.

The exhibits of domestic science, fancy work, etc. in the exhibition building should also be good as there are a large number of splendid special prizes donated by the local merchants in this division.

The sports committee is arranging a full program of running and harness races and it is expected that a number of outside horses will be here to take part in the different events.

The sports committee will also have charge of the booth and the different concessions.

## Rain Improves Crop Prospects

The crop situation here has been improved this week by several good showers, a 1/2 inch of rain being recorded at the local elevators during the early part of this week.

A local elevator man who has made a survey of the district, estimates that the crops in this area will average from 50 to 60 per cent. He reports that there are a number of fields showing an excellent stand of wheat, while others have suffered considerably from the drought.

## At the Movies.

July 16-17: "Texas Rangers."  
.. 23-24: "Garden of Allah."  
.. 30-31: "Small Town Girl."  
Aug 6-7: "Beloved Enemy."  
.. 13-14: "Fury."  
.. 20-21: "Lloyds of London."  
.. 27-28: "San Francisco."

## Annual Didsbury W.I. Constituency Conference

The Annual Didsbury W.I. Constituency Conference was held in Carstairs East Community Hall on Wednesday, July 7th, with an attendance of eighty.

Mrs. N. Eckel, constituency convener, presided, and Mrs. B. Woods was secretary.

Mrs. Wm Stewart, newly-elected Alberta W.I. president, was present and gave a splendid address.

Mrs. Chas. Mardon gave the address of welcome, which was replied to by Mrs. E. J. Schultz of Cremona.

The seven branches, Lone Pine, Mountain View, Siebertville, Rugby, Westcott, Cremona, and the newly-organized Big Prairie, all reported a splendid year and much excellent work done.

The election of officers resulted as follows:

Constituency Convener:  
Mrs. N. Eckel, re-elected by acclamation.

Child Welfare & Public Health:  
Mrs. Jas. Hughes.

Education & Better Schools:  
Mrs. Wm. Lyons.

Canadian Industries, Agriculture:  
Mrs. E. Duzey.

Home Economics:  
Mrs. E. J. Stirling.

Canadianization:  
Mrs. Jas. Hosegood.

League of Nations:  
Mrs. E. St. Clair.

Handicrafts: Mrs. A. Hogg.

It was decided that next year's conference would be held in Didsbury.

Those who contributed to the program were: Mrs. Norman Campbell, Mrs. and Miss Burnett, Miss S. Zook, Miss Lois Krebs, Miss Josie Booker, Miss Elma Alhausen, Miss Evelyn Charlton, Mrs. J. Hosegood and Mrs. R. A. McFarlane.

The Siebertville W.I. ladies served a splendid dinner at noon and also afternoon tea.

## Norman Frasch Leads Jockeys

Jockey Norman Frasch of Didsbury, apprentice rider, is Western Canada's leading jockey. Friday he rode four winners at Calgary and took over first place from Jockey Albert Bodiou.

Frasch had his first mount last summer. He didn't show a great deal as a jockey when he first started, but this spring at the Winnipeg meeting he had great success and has been improving all during the season.

At the Victoria Park (Calgary) races he had twelve winners, three seconds and two thirds. Next to him comes Jockey Lawrence Dupre with seven winners, four seconds and three thirds.

Including the Winnipeg meeting of 28 days, Frasch has now 27 firsts, 17 seconds and 13 thirds.

If he continues at the present pace it will not be long before he joins famous Calgary jockeys on the big tracks like Johnny Longden, Smoky Saunders, Eddie Litzenger and George Woolf.

"One of the more worthwhile films to come out of Hollywood in recent months is Dickens' 'A Tale of Two Cities.'"—St. Louis Globe-Democrat. Blonds?

## LOCAL & GENERAL

Miss Edith Royds left on Monday to visit her sister, Mrs. A. Davey.

Mrs. Tom Stark of Calgary is visiting Mr. and Mrs. J. A. McGhee this week.

Mr. R. Ahearn of Vancouver is relieving at the C.P.R. depot during the absence of Mr. P. Miquelon.

Miss Maisie Sinclair spent a pleasant weekend in Calgary with her friend, Mrs. Gordon Johnson.

Mr. and Mrs. Alex Robertson, Miss Lucille Smith and Mr. Milt Ford returned on Monday after spending a week in Jasper Park.

Mr. and Mrs. Roger Barrett and family spent the weekend at Sylvan Lake, the guests of Mr. and Mrs. S. F. Brown.

Mr. and Mrs. A. H. Foote and sons Delmar and Eldon are holidaying at Vancouver and other coastal points.

Mr. Walter Simon of Salem, Ore., is visiting with Mr. and Mrs. Lee Sanderman and is renewing acquaintances with friends in the district.

Mr. and Mrs. H. J. Friesen have Mr. and Mrs. T. Christensen and family of Lethbridge and Mr. and Mrs. W. D. Allan and family of Vulcan as their guests.

Mr. and Mrs. Jack Pearson of Bashaw visited during the past week at the home of Mr. and Mrs. Pearson's parents, Mr. and Mrs. G. H. Liesemer.

Miss Betty Barrett left on Thursday in company of her grandparents for Salt Lake City. Miss Betty will reside with her grandparents while attending the University of Utah.

Mr. C. S. Mortimer with his sons, Don and Bob, spent the past week at Sylvan Lake. They had as their guests Stewart Liesemer and Bob Barrett and from reports received, Charlie was a busy man as chief cook.

Douglas Wordie was successful in passing his Grade 5 Toronto Conservatory of Music examination with honors. Douglas also wrote his grade 1 theory examination in which he received 1st class honors. He is a pupil of Mrs. R. A. Gulliver.

Miss Eileen Geeson has received word that she was successful in passing with honors her Toronto Conservatory of Music examination for history and counterpoint.

## Annual Camp Meeting.

The Annual Camp Meeting of the M.B.C. Church, Didsbury, will convene Friday, July 16th, at 8 p.m. on the Bible School campus.

Miss Willia Caffray of Chicago, Ill., will be the evangelist. She is a very outstanding and successful preacher of the gospel, having spent many years in the field of evangelism.

Miss Mildred Davidson, who accompanies Miss Caffray, will have charge of the song services. She also is a very capable children's worker and will have charge of the daily children's service at 1:30 p.m.

Mrs. W. M. Redfield will have charge of the daily young people's meeting at 1:30 p.m. There will be a Young People's Rally Day and Bible School on Wednesday, July 21st.

Rev. D. C. Eby, missionary to the Armenian people in Turkey and later in Syria, will be present during the Camp and will speak at the afternoon service Friday, July 23rd. You will want to hear him.

A large number of the pastors with their families are also expected to be present at the Camp.

Rev. C. J. Hallman will be in charge. There will be three services daily besides the Y.P. meeting and children's services. The first service will commence Friday (tomorrow) evening at 8 o'clock.

Plan to attend one or all of the daily services.

## WEEKLY SERMONETTE

We should continue to pray because our wants continue; we should continue to praise because our mercies continue. Who is there so full that he wants nothing and who is so empty but hath something? Is not the mercy we want worth asking for; and is not the mercy we have worth acknowledging? Let us therefore wait upon God in His House in prayer and praise.

## Paved Road from Border to Banff

Next year Alberta will have a hard surfaced highway from the international boundary in Waterton Lakes park to Banff national park, according to a recent prediction by Hon. W. A. Fallow, Minister of Public Works for this province.

This year's program includes 150 miles of "blotter" surfacing, which takes in 70 miles from Waterton park to Macleod and 22 miles from Calgary to Okotoks.

There is also 52 miles on the Edmonton to Calgary main highway, made up of 30 miles from Calgary to Crossfield and 22 miles from Edmonton to Millet.

On the Waterton to Macleod project the province will be aided by a Dominion grant of \$75,000 (under the park to park development scheme inaugurated by the Dominion last year).

"We welcome the minister's assurance that there will be a hard-surfaced road to Banff next year, when the links have been filled in," said an official of the Alberta Motor Association.

"Let it be widely known that this program of improved road surfacing is being substantially extended and there will be a big swing in tourist movement to this province."

## Evangelical Church Notes.

Rev. Edwardson of Edmonton will be in charge of the service next Sunday morning and will bring the message. The evening service will be lifted because of the Mennonite Camp-meeting, but the Sabbath School will hold its regular session next Sunday morning.

Both the morning and evening services as well as the sabbath school will be lifted July 25th. You are urged to attend the Camp-meeting.

## A Helping Hand Needed

Something should be done to ensure a substantial reduction in the marine insurance rates at present prevailing for cargoes shipped from Canada to Europe via the Hudson Bay route, if Western Canadian farmers and shippers are to reap the full benefit of the national investment in the short route between the two continents.

Under existing tariffs it costs approximately four and one-third times as much to insure a cargo of grain or any other commodity from Churchill to a European port as from Montreal to the same destination on the other side of the Atlantic.

In view of the numerous mechanical and other safeguards for shipping using the route provided by the government and in the light of experience this differential is too great and is not warranted in making comparison of the hazards as between the two routes.

This statement is made, too, in the full knowledge of the fact that two disasters are charged up against the route, including the comparatively recent loss of the Bright Fan, but with respect to the latter, if statements made in Parliament can be credited, this latest disaster cannot be blamed upon the route itself.

Figures revealing the unwarranted spread between insurance rates for the two routes were quoted by Hon. C. D. Howe, Minister of Railways, in the House of Commons at the last session when he announced that a ship cargo from Montreal to Europe was assessed \$1,812.50 compared with a charge of \$7,875 levied on a similar cargo from Churchill to Europe.

Another interesting bit of information given by Mr. Howe at the same time was the announcement that to date the country has spent a total of \$43,000,000 on the Hudson Bay railway and the port of Churchill and its facilities.

At four per cent. this would entail an annual interest charge of close to a million and three quarter dollars. Not only does the rate at present fail to earn a dollar of this overhead but, in addition, the revenue fell short of operating expenditures last year by \$326,000.

In other words before the short and direct route between Western Canada and the European markets can be made to pay its way, its annual revenue must be increased by at least another two million dollars per annum.

There is only one way that this can be done and that is by increased volume of traffic using the route and anything that militates against this objective must be overcome as speedily as possible. One of these impediments is the high marine insurance tariff. Another is, of course, the short navigational season, involving the necessity of carrying stocks of grain over from one season to another to ensure cargoes for incoming boats and resulting in the accumulation of storage charges. When these two handicaps are combined they present a wall which is difficult to surmount.

Nature at present blocks the way to an extension of the navigation season, though there is always a possibility that science may someday come to the aid of the route in this respect. The other handicap, that of marine insurance rates, however, is one which can be overcome, when it is remembered that the tariff is unwarranted and excessive.

If this particular handicap is removed it should go a long way towards reducing the cost of using the route and this, in turn, cannot fail to result in the increased volume necessary to ensure and maintain lower freight costs and hasten the day when the Hudson Bay route may be expected to stand on its own feet financially.

Evidence that the rates are an excessive surcharge on shipping using the route was given in the House of Commons by Mr. Howe when he said that he had spent a great deal of time at Churchill and had talked to many captains of ships entering the port. He testified that they agreed it was "ordinarily a safe route as Hudson Strait was wide and deep and the danger of ice was slight owing to the service provided by the government ice breaker which kept tab on ice movements."

There are two or three means which might be used to either ensure reduction of the insurance rates or to bring about the same effect. One of these is for the interested governments to bring pressure to bear on the rate-fixing organization by submitting overwhelming evidence that the rates are beyond reason. The other is to subsidize the route to the extent of the insurance surcharge until such time as increased volume of traffic will enable the route to absorb this burden without loss or until the rates are reduced.

If the first is tried and fails then, perhaps, the latter method should be given a trial. A good argument for at least temporary subsidization is to be found in the fact that the government is giving subsidies to shipping companies operating on both the Atlantic and Pacific coasts, as pointed out by some of the western members on more than one occasion when the subject has been under discussion.

## WAKE UP LIKE A CAVE MAN!

Jump out of bed full of life. Say good-bye to dull, tired mornings. Help yourself to glowing health.

Get rid of tired, sluggish, bad-taste, headachy mornings. Follow the example of thousands who have regained full health and energy with Fruit-A-Tives. The prescription of a famous Canadian doctor, Fruit-A-Tives contain extracts of fruits and herbs and act to bring normal, healthy liver action, stimulating the flow of bile, helping four other vital organs... cleanse the elimination tract of wastes and poisons... tend to purify the blood of poisons and acids. Fruit-A-Tives' unique tonic effect brings new energy, new health. So try Fruit-A-Tives today. For sale everywhere. Cost is low, 25c, 50c.

**FRUIT-A-TIVES LIVER TABLETS**

## Class Distinction

Royal Henley Regatta Will Allow Mechanics And Laborers To Compete

For the first time in its history the Royal Henley regatta next year will allow mechanics, artisans and laborers to compete.

Action effecting this change was taken by the Amateur Rowing Association following a campaign of protest against what was termed "class distinction."

The clause which hitherto had defined the term "amateur" in respect to rowing had been in existence for 55 years.

## Requires Skilled Surgery

Doctors Explain How New Pipeline To Heart Is Built

Building a new pipeline to the heart in one of the most delicate of all surgical operations was declared by Dr. Harold Fell and Dr. Claude S. Beack of Cleveland to have brought back to near normal a dozen people near death from starvation of the heart.

In an address before the American Medical Association at Atlantic City the Cleveland surgeons explained how they sever a portion of the large chest muscle and insert one of the free ends into a small slot in the pericardium, or outer sac which encloses the heart itself.

This end of the muscle attaches to the heart, they explained, by natural growth and thus a pipeline is established from the blood supply of the muscle to the heart. Twenty persons in advanced stages of heart trouble have had these pipelines installed, they added, and eight died within 10 days after operation.

The remaining 12 were materially benefited and five of them returned to the jobs they held before the operation. Further refinements of technique promised to further reduce the number of deaths from the operation, Dr. Beack declared.

## Wages Low In Yugoslavia

Workers' Pay Just Allows Them A Wretched Existence

Women employed in industry in Yugoslavia are rapidly increasing in numbers, according to data contained in the daily paper Pravda. The number has mounted from 61,000 to 230,000 in three years. Of these, almost half are under 22 years.

This rapid increase in the number of women workers is said to be due to the economic crisis. The wages of men are so low that women have to seek employment in order to eke out the family income. This very fact causes a still greater decrease in the pay of both men and women.

Most women receive less than half a dollar a day, and girls even less. Yugoslavia's labor laws, which are excellent in theory, are left unapplied in a great many cases.

Pravda, which is a conservative daily, says: "Wages are sinking and working conditions are getting worse. More women are asking for work, most are disorganized; so the employers are able to press the pay down to the bare level of a wretched existence."

## SELECTED RECIPES

### PLAIN BLANC MANGE

2 cups hot milk  
4 tablespoons Benson's Corn Starch  
¼ cup sugar  
½ teaspoon salt  
¼ cup cold milk  
½ teaspoon vanilla

Method: Scald 2 cups milk in double boiler. Mix Benson's Corn Starch, sugar and salt with cold milk. Add slowly to hot milk, stirring constantly until thick. Cover and cook for 15 minutes, stirring occasionally. Remove from heat; add flavoring; pour into moistened moulds and chill. Serve with jam, jelly, canned or raw fruit, or Custard Sauce, or "Crown Brand" Corn Syrup.

## Belongs To Sea Gods

Chinese Sailors Refuse To Talk To Rescued Quartermaster

Although How Tsu Chang, 54, Chinese quartermaster of the lost steamer Haiping, was rescued from drowning by the crew of the Mildura, he is still officially dead to his countrymen, who say that he now belongs to the "sea gods." They refuse to talk to him or to recognize him. Before the Mildura reached Brisbane, Australia, they nearly decided to throw him back to the "sea gods," from whom they said he had been taken.

Heavy seas washed Tow Tsu Chang off the Haiping. He was thrown on a bar, which he tied beneath his knees. He wrapped his lifebelt around his neck, and floated towards the Mildura. Had he floated back towards the Haiping he would not have been picked up. He would have had to escape from the "sea gods" by himself. He is now being blamed for the rough weather the ship encountered. The Mildura arrived at Brisbane with the Haiping's crew and stories of heroism in wild seas.

## Testing Out New Device

Gadget Which Marks Examination Papers Works At High Speed

The development of a gadget to correct and grade examination papers automatically may revolutionize education. At least it will simplify the tasks of teachers, many of whom work long hours after school is closed to mark the examination papers of their students. The teachers do not have the short hours which many claim they have owing to the dozens of other duties necessary in connection with their positions and mainly the marking of examination papers. So, if and when this new gadget becomes universally employed, the overworked employees of places of learning may throw their hats into the air and give three hearty cheers.

The device which has been sponsored at Athens, Georgia, is said to work with the speed of electricity and will correct an examination paper of the true, false or selective question variety and show the grade on a meter. F. S. Beer, examiner of the university system of Georgia, who had a hand in promoting the machine's development, reports that it works on the principle that a soft pencil mark is electrically conductive. The current of electricity flowing through the pencil marks made by the student causes the recording device to function.

Truly such a device should result in a great saving of time. In connection with the operation of the device, the student writes his answers in one of two or more optional columns on a standard printed form. As each paper is inserted in the machine, electrode blades descending on the paper determine which questions have been answered correctly. Time will tell whether the device can be made to function accurately.—St. Thomas Times-Journal.

## To Photograph Eskimos

Young Boston Man On Expedition Into Northern Canada

His duffle bag already packed, 27-year-old Prentice G. Downes of Boston, prepared to leave on a one-man photographic expedition into northern Canada and the sub-Arctic.

Downes will take pictures of Indians and Eskimos and of the country through which he travels, for the New England museum of natural history, sponsor of the expedition.

The blue-eyed and slightly-built scientist will enter the northern wilderness from Flin Flon, Man., and live for six weeks among the Cree and Chippewyan Indians.

Early in August, he expects to return to Fort Churchill on Hudson Bay, and board the Hudson Bay Company's relief ship, H.M.S. Nascopie, for her annual visits to the company's northern posts.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

## Praise For Little Theatre

Movement In Canada Forging Ahead, Says Michael Saint Denis

The Little Theatre movement in Canada is going ahead with leaps and bounds and in time it will become professional "in the right way," says Michael Saint Denis, who served as adjudicator in the finals of the annual drama festival in Ottawa.

Saint Denis was high in his praise of the standard of the plays offered and the work generally being accomplished in the amateur theatre in Canada.

"I regard this as very encouraging for the future," he said, "as I have always believed the best kind of theatre comes from the people themselves. It is not something that is forced on them out of financial motives, from above."

He found Canadians spontaneous and intensely alive. The audiences, he said, were responsive, intelligent and interested in the technical points of a production.

"The thing that I missed was a leader and a central organization to bind all these activities together," the director declared. "The distances between them are immense, I know, but a more frequent interchange of ideas would be valuable and it ought to be possible for a well-chosen professional company from this country to tour Canada every year and give the people there a wider standard of comparison."

## Let Babies Cry

Doctors Say They Are Merely Trying To Raise Their Blood Pressure

Don't pick a baby up when it cries, a group of University of Georgia physicians cautioned, because it is merely trying to raise its blood pressure. By a new delicate method of measuring blood pressure, they have determined what babies have been trying to tell their adult enemies for thousands of years. These measurements have shown that at birth a baby's blood pressure is about 75 per cent. of the pressure of adults, they declared, and the baby knows that to grow properly it must begin building up steam.

## Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

## Swine Industry Second Only To Wheat In Volume Of Trade With Britain

In 1936, Canada exported more than \$28,000,000 worth of pork products to the United Kingdom. This placed the hog producer second only to the wheat producer in importance to this country with respect to volume of trade with the Motherland, and represented an increase in financial return over 1935 of approximately \$7,000,000. When it is remembered that this money was distributed among a very large number of Canadians, importance of this part of our agricultural production becomes apparent. Not only did the hog represent an important source of revenue to farmers but railways, truckers, stockyards, packing plants and allied trades were able to employ more help and pay more wages and so assist in the national re-employment plan. The hog could well be characterized as a national "mortgage lifter."

on hand in England at all times. We must try to protect the foothold we now have on this market and our best protection is the appearance there of regular supplies. In spite of the fact that feed prices have advanced sharply, producers should make every possible effort to maintain their production, if they expect to grow and sell hogs at a profit in the coming years.

A gradual expansion of hog production, with provision for the maintenance of such expansion would be a desirable thing from a national point of view. The market abhors extremes and the alternation of light and heavy runs of hogs places the industry in a state of jeopardy. The competition for the British bacon market is keen. A number of nations would like to sell more bacon there. "If we do not take advantage of our allotted quota, some other hog

A uniform lot of Wiltshires. Note the finish, balance and ham development

A very encouraging feature of the hog industry is the availability of the world's biggest bacon market to Canada. The Ottawa Agreements of 1932 giving us a quota of 280,000,000 pounds of ham and bacon per year, were to all intents and purposes, extended in 1937 by the Anglo-Canadian Trade Agreement. On the basis of marketability we still have room for more hogs in Canada. This cannot be said of all agricultural products and is a feature of fundamental importance when considering the expansion or introduction of any industry. It is well to remember that in 1936 we took advantage of only about 55 per cent. of our quota. The following figures, in pounds, indicate the gradual increase in our exports of bacon and ham to the United Kingdom and the distance that we still have to go to fill our allotted quota:

1931	10,961,000
1932	30,693,400
1933	71,524,700
1934	119,707,600
1935	124,327,900
1936	154,768,800

This increasing supply has been getting a very acceptable welcome and sale in the Motherland. We have established regular customers there—people who ask for Canadian bacon and depend on it. We should try to keep these customers. A major factor in keeping them is having a supply

producing country will. Other British colonies are becoming interested in hog production. Doubtless our ability to supply bacon to the United Kingdom during the term of the present trade agreement will be reflected in arrangements which the British Ministry make for their future supplies.

Most of the hogs grown in Canada are produced in small groups. Few "hog ranches" or sow herds exist. One, two, or three sows per farm is the extent of breeding stock usually maintained. This relationship of hogs to the farm business is probably the result of long experience on the producers' part and is quite possibly the correct way to produce hogs. When it is recalled that the hog is used to market the by-products of the farm—coarse grains, low-grade commercial grains, dairy by-products, and household waste—it is quite logical that a limited number of hogs would make most profitable use of such products as are usually available. In some cases, producers have taken the attitude that because they only raise a few hogs, the quality of their product does not make much difference. This is regrettable because every producer, no matter how limited his production, influences the average quality. Hog grading was instituted to remunerate producers of quality hogs for their care and judgment. It will pay all producers to keep top grades as their objective.

### Joke Was On Owner

**Keeper Of Fashionable Hotel Had To Pay Luncheon Check**

The other day Judith Anderson, the actress, was lunching in the Algonquin. She was alone. When Frank Case, the owner of the hotel, saw that she had reached her dessert, he sat down at her table for a chat.

"If there's one thing I don't like about my place," he told Miss Anderson, "it is that so many men come in here to lunch by themselves. And that's not the worst of it. When they have finished they get up, look around the dining room for a pretty woman of their acquaintance and begin a conversation. I think the least they can do in return for the pleasure of talking to a lovely woman is to pay for her luncheon."

Miss Anderson called the head-waiter.

"George," she said, "give my check to Mr. Case."

The joke was on the town's tallest, most suave and literate innkeeper, but he loved it.—New York Post.

### World's Busiest Waterway

**Great Lakes' Traffic This Year Expected To Exceed Record**

The record year for the Great Lakes, measured by the statistics taken at the Soo, was 1929, when the total was 138,574,441 tons. It is predicted the figures for this year will be greater than that high mark.

It is a tremendous thing, this traffic on the world's greatest inland waterway. It is a commonplace to remark that the traffic through the Sault canals is greater than that through Panama or the Suez Canals, but in 1929 it was greater than the combined traffic through the other two.

The tonnage of freight received and shipped from Great Lakes ports that year exceeded that of the Atlantic, Gulf of Mexico and Pacific ports of the United States and the gross tonnage of the vessels employed in that traffic was greater than the merchant fleet of Holland and almost equalled that of France.—Port Arthur News-Chronicle.

### Valuable Manuscripts

**Unpublished Letters Of Elizabeth Browning Bring Good Price**  
Manuscripts and unpublished letters of Elizabeth Barrett telling of her romance and runaway marriage with the poet, Robert Browning, brought \$15,000 at public auction in London.

The letters were part of the collection of Mrs. Browning's nephew, the late Lieut.-Colonel H. P. Moulton-Barrett, which was ordered sold by his executors.

A letter written by Miss Barrett at the age of six to her mother brought \$110; 111 letters to her sister Arabel, \$4,750, and 57 letters to her brother George, \$1,700.

Eloping with Browning to escape her autocratic father, Miss Barrett wrote in most of the letters of her departure and married life. Included in the sale were a number of manuscripts left behind on September 19, 1846, the day she departed from her home at 50 Wimpole street.

The collection is considered to be the most important group of Browning material put on the market since Browning's own papers were sold in 1913 for \$139,680.

## League Of Nations Society And Canada's Position In The Event Of War

### Preference In Notables

**Lord Tweedsmuir Speaks Of Statesmen Whom He Has Known**

In a luncheon address at St. John, N.B., Lord Tweedsmuir indicated his preferences in notables, now dead, whom he had known. Among men, as "builders," he selected Cecil Rhodes, Lord Cromer and Theodore Roosevelt, William Gladstone and Herbert Asquith were mentioned as great party leaders. Of philosophic statesmen His Excellency preferred Lord Balfour and Sir Wilfrid Laurier. "Lawrence of Arabia" was the one soldier of genius I have known.

Of all the literary men he had known he thought the name of Rudyard Kipling would be remembered the longest.

"I hope I won't be considered a stiff traditionalist if I say that in my own recollection it seems to me the power of public speaking has declined," said His Excellency. "I hope it will not be considered high treason if I say that there is no one in Canada to-day who speaks as Sir Wilfrid Laurier spoke."

"I am inclined to think radio is taking the heart out of oratory. Yet it will always be a great art, and perhaps conditions of the wireless will produce a new kind of oratory where the demagogue will be at a discount."

On the subject of literature Lord Tweedsmuir said he had known many men of letters "though not, perhaps, as many as I ought, for as a class they never attracted me. I much prefer journalists, who seem to me to suffer less from spiritual pride."

### Serves As Protection

**Idea For Use Of Newsboys Is Also Good Advertising**

Newsboys in Philadelphia wear electric signs that flash across their chests the name of the paper they represent. The sign not only has a strong advertising appeal, making it easy to "spot" a newsboy on a crowded street at night, but it protects the boy selling papers in automobile traffic. To be practical, the chest lamp had to be shockproof and operate on a portable battery. The name of the newspaper is made of a single continuous tube of glass, its base embedded in a plastic substance which protects the tube from shock and breakage. The sign is activated by a battery which gives 48 hours service on one cell. A small vibrator changes the direct current to alternating current and a transformer steps up its voltage. Battery, vibrator and transformer are carried in the boy's apron.—Popular Mechanics

### Would Export Helium

**U.S. War Department Approves Exportation In Peace Time**

Major General Oscar Westover, chief of the United States army air corps believes dirigibles can be used "very effectively" against United States industrial areas during mobilization for any future war.

In an appearance before a senate military affairs sub-committee studying a bill to permit exportation of helium, Westover said the big sky-raiders can be "a very decisive factor in the initial stages of defence."

Westover was disclosed to have told the committee the war department approved exportation of the gas for "humanitarian, scientific or strictly commercial airship purposes" in peacetime.

In wartime, however, Westover added, "it would not make much difference whether you have helium or hydrogen—if you are going to accomplish your military mission, you are going to sacrifice everything."

### Tea Towels Furnish a "Dutch Treat"

Household Arts by Alice Brooks

Do Tea Towel Motifs in Realistic Colorings

### PATTERN 5868

Folks! Meet the "Dutch Twins" who find housekeeping all play and no work. You're sure to make quick work of their animated antics, embroidering them in speedy 8-to-the-inch cross stitch on a set of tea towels. You can use every color of floss you own in these seven quickly stitched motifs, for Hans and Hulda are indeed "colorful" characters! Order the pattern and make a set for your own kitchen, or another's. In pattern 5868 you will find seven motifs—one for each day of the week, averaging 5½ x 8 inches; material requirements; illustrations of all stitches used and color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Canada's position in the event of war, and how Government policy in such an eventuality would compare with avowed League of Nations policies, was debated when the newly-elected executive committee of the League of Nations Society in Canada met at a luncheon at the Chateau Laurier in Ottawa, under chairmanship of Senator Cairine Wilson.

Principal R. C. Wallace, of Queen's University, said he was perplexed, as a member of the society's executive, as to the real position of Canadians in the League of Nations Society, and the relation of them to what was, presumably, governmental policy at the present time in Canada. He believed this should be clarified, and said: "If collective security means that we have to insist to the Government that Canada has to be ready to take part in a League war, in any part of the world, I think we would find ourselves in a position of isolation in Canada."

Hon. R. J. Manion, former Minister of Railways and Canals, said the point raised by Dr. Wallace was an urgent one. "We all want to live up to obligations that Canada takes upon herself. But, until there is something like a united opinion with regard to what Canada should do, we are up against a difficult proposition."

John W. Dafoe, of Winnipeg, declared his opinion was the League of Nations Society in Canada was definitely a propaganda organization, moving to make an effective League. It was not merely a gathering to speak of the beauty of peace. "I would like to see in Canada an organization which has a definite view that would call out and create public opinion in the face of this country not living up to its obligations," he said. Mr. Dafoe declared the League of Nations Society had expressed that view, and he supported it heartily.

The executive meeting was well attended, and considerable discussion took place. Representatives were present from the Canadian Teachers' Federation, the Dominion Command, Canadian Legion, National Council of Women of Canada, and the Trades and Labor Congress, and letters were received promising support from the Social Service Department of the Church of England in Canada and others. Ottawa Journal.

### Livestock Production

**Export Marketing Is One Of The Three Most Important Phases Of Industry**

Export marketing is one of the three important phases of livestock production, Hon. J. G. Gardiner, federal minister of agriculture, told 600 Holstein-Friesian breeders at Guelph. He said the other two phases were good breeding and good feed.

Mr. Gardiner said he recently visited England and learned from farmers there what small things governed the export market. One farmer in Cheshire had 133 Canadian Holstein cows and he declared he would not use any others on his dairy herd.

However, said Mr. Gardiner, many Canadian dairy cows were slaughtered at the wharf because they did not come up to English standards. He found England wanted a cow which might be bred so as to produce good beef.

Watching a sale of steers in Glasgow, at which animals averaged \$90, Mr. Gardiner discovered Scottish and English farmers did not want steers which had lost part of an ear. The reason was that the British government pays a bonus to farmers who take these steers and feed them for three months. They punch each one in the ear so that it could not be sold for this purpose twice, and in the case of cattle with damaged ears, they might suspect the farmer had clipped the ear to remove the punch mark.

He had come to the realization, Mr. Gardiner said, that more information on the requirements of the export market was needed by Canadian producers.

British railways carried 109,033,434 passengers in a recent month.

### Will We Help?

During the past year the Alberta Division of the Red Cross required \$25,071.56 to cover the cost of the work done in this province. This year the Society has been called upon to assist 5,237 families in the drought area with bedding and clothing in addition to its regular services of helping crippled children, Junior Red Cross in the schools, relief of suffering people, providing medicines to urgent cases, and care of the sick and expectant mother.

In an appeal to the people of Alberta last May the Red Cross Society sent out 524 circular letters to newspapers, churches, Women's Institutes and secretaries of municipal districts and in response received the amazingly insignificant sum of \$937.84. What a slap in the face to that spirit of generosity so well known in Albertans! We realize fully the conditions which prevail throughout our province in respect to crop failures, drought, hail, etc., but when we think of the people of Saskatchewan contributing more than \$35,000.00 to their Red Cross last year, we believe that the people of Alberta will gladly do the same if given the opportunity.

The Alberta Red Cross invites everyone to aid in the great work done by the society. Farmers may contribute by leaving a bushel of wheat at the elevator. Price of this will be turned over to the Red Society. Others can subscribe by mailing a dollar to the Didsbury branch of the Red Cross or call in and leave your subscription at the Pioneer office.

The aid and co-operation of every citizen is asked for in this drive for funds as failure to reach the objective set will mean curtailment of the work of this society, work that has been a boon to the needy of Alberta since its inception in 1920 of the peace time policy of the Red Cross.

### Gov't. to Change Method of Sales Tax Collecting

Establishment of an official receipt system for collection of Alberta's ultimate purchasers' tax which will require every merchant to issue a receipt for every penny of sales tax collected, was announced last week by E. C. Shaughnessy, acting superintendent of the provincial sales tax branch. The new receipts will be issued from September 1st this year.

This important change in method of collection of Alberta's sales tax revenues followed investigation early this year into receipt systems as operated in Ohio. Mr. Shaughnessy visited Ohio, conferring with leading merchants, retail organizations and government officials on efficiency of the receipt plan for sales tax in that state.

Receipts to be issued here will be furnished by the government. They will be charged out to all merchants at time of issue, and retailers will make monthly returns covering sales tax transactions. Monthly returns at present report total sales and total tax to be remitted. Forms after September 1st, when the receipt system will be in operation, will require a reconciliation statement of tax receipts.

## The World of Wheat.

By H. G. L. STRANGE  
Director "Crop Testing Plan."

The drought consumes us. There on high  
The hills are parched, the streams are dry.  
The drought consumes us. Still I strive  
And will not leave while I survive.

—Chinese poem about 900 B.C. from the Shi King collection of Confucius.

Devastating droughts, as we can perceive from this ancient Chinese classic, is no new thing.

Steadfast striving against the difficulties of drought, too, it seems, is not new, for it has been the common rule in all ages with those who till the furrowed face of the land.

For six, in some places eight, long dry weary years, the farmers of southern Saskatchewan have demonstrated to the world their determination to survive. Each spring, with gradually diminishing resources, these courageous people, in keeping with the ancient spirit as shown in the Chinese classical poem have seeded and cultivated the land with faith and hope.

Unfortunately to survive in farming requires more than faith and hope. Material resources which cost money are vital necessities too.

In the dry area many have now come to the end of their material resources. Let us hope that these splendid farmers, these most courageous Canadian citizens, may be saved not only for western Canada but for Saskatchewan itself, by being re-established somehow among fellow farmers in known good rainfall areas of the province.

The following factors have tended to raise price: Worst drought in history of western Canada may produce lowest yield per acre on record - Rust damaging winter wheat crop - Rust spores appearing in U.S.A. and Canadian spring wheat crop - Evidence money inflation beginning to have effect in raising commodity prices in general - Fear of war in occidental and oriental countries.

Following factors have tended to lower price: European countries using substitutes for wheat in bread - World demands for wheat decline as prices advance - Winter wheat and rye harvest begins in Europe - Exportable wheat surplus expected in Roumania - Algerian harvest under way - Fig crop larger in Greece.

They were scarcely seated in the theatre before one of them nudged his shipmate and asked:

"What does the word 'Asbestos' mean across the curtain?"

"Pipe down," said his companion, "and don't show your ignorance. That's Latin for Welcome."

**Three Pony Mares For Sale**; two bay and one pinto; ages 8, 3 and 1.—W. D. Spence, phone 91 (271c)

**Fighting Couch Grass.**

"There is a lot of couch grass in this district and many people will wake up pretty late to the fact that they have something to fight. My fight is on until I get rid of it."

These words are from a thorough farmer who discovered the vicious grass in a field of rich black soil and devoted the summer of 1935 to its eradication, keeping the land black with a one-way disc. Success seemed to have crowned his efforts, for no couch grass appeared in the 1936 oat crop, nor in its stubble that autumn. Nevertheless, a few scattered blades showed up in 1937, so he is renewing the battle.

On the Beaverlodge Substation couch has never become generally established, but stray plants are found on most of the areas where Western ryegrass had been sown, it having often occurred as a seed impurity. One of several reasons why Western ryegrass is no longer advocated is that the heads are not readily distinguished in a standing crop, while the threshed seed is still more difficult to distinguish.

With only scattering plants to deal with, the Substation method has been forking these out and keeping the surface black by hoeing, but a deal of forking is demanded and one never knows when he is through with a patch.

Where cultivation or forking is impracticable chlorates have been tried, but several applications have been found necessary. The cost is high and nothing grows well on the ground for some time afterwards.

A special type of spring-tooth cultivator has been used in other regions with good effect, the object being to tear out the root stocks and leave them strewn on the surface to dry out. This method undoubtedly has its advantages. With scattering infestations care is called for to avoid conveying the root stocks to unfested areas. From this standpoint the one-way disc is good.

Whatever the method, thoroughness is required. One tinge of green and the breath of life is renewed in the tenacious root stocks. Hundred per cent work is needed.

Mountain View M.D. No. 310.

**NOTICE ON WEEDS**

Attention is drawn to Sec. 18 of the Noxious Weeds Act, 1932: "It shall be the duty of every person who is the owner of any parcel of land and of every person who has any beneficial interest in any parcel of land and of every lessee, tenant or occupant of any parcel of land to prevent any noxious weeds from growing upon such parcel of land, and to comply with all the provisions of this Act for the destruction thereof."

"Land" means and includes not only all lands owned and occupied or controlled by any person but for the purpose of this Act, also includes all the land up to the centre line of all contiguous roads or roads allowances.

Your compliance with this Act regarding weeds on road allowances is especially requested.

## WORLD HAPPENINGS BRIEFLY TOLD

Canadian Gideons set a new record by placing 14,655 Bibles in hotels, hospitals, prisons and schools during the past year, it was announced.

Inspector O. Jeffrey demonstrated before Humane Society officials in Galt, Ont., a method of using carbon monoxide gas from an automobile exhaust to kill animals painlessly.

Rt. Hon. L. Hore-Belisha, minister of transport, pointed out that from 60 to 80 per cent. of motor accidents in the United Kingdom occur on straight roads in fair weather.

Norman William Whittaker, Victoria barrister, was named by Premier Pattullo as speaker of the 19th British Columbia Legislature, subject to approval of the House.

Forest fires in northern Manitoba and Saskatchewan have laid waste hundreds of acres of timberlands and caused many thousands of dollars damage.

G. G. McGeer, member of parliament for Vancouver Burrard, suggested a British Empire fair should be held in 1939 to celebrate opening of the First Narrows bridge, now under construction.

Fourteen passenger airplanes were put into operation on the fast air mail line linking Cologne with Cherbourg, cutting the journey from Cologne to New York and vice-versa to five days.

The Bank of Canada accepted tenders for \$25,000,000 in Dominion of Canada treasury bills due Sept. 15, 1937, the average discount price being \$99.83819 and the average yield .643 per cent.

Major General Oscar Westover, chief of the United States army air corps, believes dirigibles can be used "very effectively" against United States industrial areas during mobilization for any future war.

### To Stop Abnormal Growth

#### Operation Performed On Girl Over Six Feet Tall

Sue De Crescenzo of Scranton Pa., victim of gigantism, was cheerful as she started recovery from a rare operation performed at Hahnemann Hospital to check her growth. At 20, she is six feet, three inches, weighs 243 pounds and has the muscles that go with her size and weight. The operation won't reduce her size, but it should halt the abnormal growth, which otherwise could continue for several years until she reached a weight of 300 pounds. Besides, the malady, if unchecked, would bring blindness in a few years, and probably death. Dr. Everett H. Dickinson, professor of neuro-surgery at Hahnemann Hospital, performed the operation. A parasitic growth the size of a grape was the cause of the trouble. It grew on one end of the pituitary gland, a tiny ductless gland which regulates growth.

### Oldest Working Blacksmith

#### At 86 He Says He Would Rather Wear Out Than Rust Out

Ontario's oldest working blacksmith, James Slack, of Ottawa district, would rather "wear out than rust out," so his anvil still clangs as it has done for 71 years. At 86, Mr. Slack is hardy and smiles when he says, "I give myself four more years."

Mr. Slack was a delegate to the Master Horseshoers and Carriage Workers' Association convention at Kingston. He was apprenticed under a \$200 bond put up by his father in 1866 and for the first year got \$1 a month; for the second year, \$2 a month. When 21 he married, starting with \$7.50 and his trade.

To-day he owns three farms near his shop at Merivale.

### Doors Not For Sale

Collectors were flooding the Westminster Abbey annex contractors with staggering offers for the doors through which the king and queen passed on their way to the coronation service. Doors were made of wood from the piles of Waterloo bridge and the piles were cut in Canada. They will be placed either in one of the royal palaces or a museum.

A sensible man doesn't care if he isn't good looking; he knows that there are others.

### Knew Master's Car

#### Stray Dog Must Have Recognized Sound Of Motor

How can a dog know his master's automobile from thousands of other similar cars a block away, by the sound of its motor?

Arthur Lawson, "red-cap" at the Union Pacific in Pasadena, California, would like an answer to the question, as he told of a strange experience.

A stray dog wandered into the station. He refused to allow anyone to come near him, although accepting regular food rations from kind-hearted Arthur. For four days the dog sat on the sidewalk leading into the station watching automobiles go by. During the time Arthur estimates 200,000 or more cars whizzed along Colorado street.

"One morning all of a sudden," said the "red-cap," "the dog made a dash into the street incidentally knocking me down as he went by. He jumped into a car and sure enough, it was the owner. The strangest part about it is that he started on his wild dash even before the car was in sight."

A happy reunion between the dog and his owner followed in which the "red-cap" came in for a large share of thanks for the care he took of the devoted pet. Strangely enough, after introductions, the dog who heretofore had paid no attention whatever to Arthur or anyone else around the Union Pacific station, jumped about the "red-cap" in frenzies of joy as if he too were extending thanks.

### Trainmen Ride In Style

#### Modern Caboose Is Up-To-Date In Every Way

Modernization has caught with "the little old caboose behind the train."

The familiar old caboose with its squat cupola, its architecture unchanged for more than a quarter century, is undergoing face lifting operations on one of the big western railroads in the United States.

And not only that, but the old familiar color of brick red has been changed to the silvery sheen of aluminum, with trimmings of black. The 900 cabooses on this railway system are going through the shops for the modernizing touches. Aside from color, the most spectacular operation is removal of the cupola where once the brakeman was wont to sit and scan the long line of lurching cars ahead, watching for trouble.

The remodelled cabooses are roomier and airier. Inside are modern safety stoves on which the conductor and his brakemen cook their meals; brilliant oil lamps, a built-in refrigerator, tool lockers, leather upholstered side seats six feet long which can be readily converted into beds, toilet facilities, water supply and clothing lockers.

### Office Is Wheel Chair

#### Paralyzed Girl Would Not Accept Life Of Helplessness

A wheel chair is the office of Katy Swinden, paralyzed since childhood, who has built a profitable business in telephone calls at Houston, Texas. Relatives and friends—but not Katy—resigned themselves to the thought the invalid girl was doomed to a life of helplessness.

A minister gave her the idea that led to her novel business venture. He installed a telephone and offered to pay her a small amount to make calls concerning church activities.

Katy quickly extended the service. She contacted various clubs and offered to make their telephone calls. Now she makes club appointments for many large organizations. The work pays her a steady income.

Few of her customers know she is an invalid. She sells her service on a business basis—her chief asset her crisp, clear "telephone voice."

Katy, who makes her own clothes and paints for a hobby, has built a small poultry business as a side line. She is the mascot of the Houston fire department.

### Lagging Behind

Asserting Canada was "seven years behind in the training of the worker," Prof. W. A. MacIntosh of the national employment commission, said the Dominion should sponsor schemes for "physical, moral and spiritual reconditioning" of her jobless.

Canada has 42,363 miles of railways.

### Grade Crossing Accidents

#### Fatalities From This Cause Are Said To Be Increasing

The extent to which simple carelessness causes traffic accidents is graphically illustrated by a recent bulletin from the Association of American Railroads, which points out that fatalities from grade crossing accidents are going up.

In most cases, probably, a grade crossing accident is due principally to the motorist's carelessness. But this bulletin contains added proof of that theory by showing that in 79 per cent. of last year's grade crossing accidents the speed of the train involved was less than 40 miles an hour.

In other words, the auto in such accidents is not struck down by a thunderbolt which comes on the driver so fast that the driver cannot get out of the way. In practically four-fifths of the accidents, the train is moving at a moderate speed. It is almost impossible to escape the conclusion that just a little care on the motorist's part would do away with nearly all of these disasters.

### Still Seeking Sign

#### But Search For Reincarnated Dalai Lama May Be Over

A nine-months-old baby may rule the roof of the world. Since the 13th Dalai Lama, political pontiff of Tibet, died in 1933, the search has gone on unsuccessfully for his reincarnation. Recently when the Panchen Lama, the religious head of the Buddhists, was blessing a large crowd of his followers, a mother carrying a baby came up. The baby grabbed the panchen's beads and refused to give them up. Accepting this as a sign, the Lama sent men and money to take care of the baby and, unless a more powerful sign is given, the nine-months-old child will probably become the 14th Dalai Lama.

### MAKE THIS MODEL AT HOME AND WEAR IT ALL DAY LONG

By Anne Adams

Summer's in the air! Warm days are already here, so delay no longer if you'd make up this coolest and smartest of warm weather frocks. What action-freedom you'll find in brief cap sleeves that are accented by sparkling buttons to carry out the decorative note of crisp revers and button-front bodice! Like to acquire a golden sun-tan? See the deep V-neckline in back! There's easy-making to Pattern 4439, and "beginners" will welcome such simple cutting and stitching. You've wide choice of fabrics, and colorful cottons are your "best bet", so choose percale, seersucker or shantung.

Pattern 4439 is available in misses' and women's sizes 14, 16, 18, 20, 32, 34, 36, 38, 40 and 42. Size 16 takes 3 yards 36 inch fabric. Illustrated Step-by-Step Sewing Instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

## THE CANADIAN ADVENTURE TRIP OF BOB SIM, AN ONTARIO FARM BOY

No. 3 of a Series of 16 Letters

Ontario — Quebec — Nova Scotia: Bob mentions them all in this letter. He's hitch-hiking now, either the flivver or the pocket book couldn't stand the gaff.

Bob sees salt water for the first time and tries to eat raw clams on the half shell—he's learning a lot of things including how to "wiggle his thumb" for a ride!

Truro, N.S. (Special Despatch by Bob Sim).—At Toronto I abandoned the idea of using the family car in favour of hitch-hiking. I should have explained that last week, but did not have space. Now hitch-hiking, my friends, is a gentle art. You dress carefully, but not gaudily, for you must assure motorists that you are not a hobo, and at the same time, not wealthy. You wiggle your thumb in the general direction of the desired destination. If you are lucky, someone picks you up. If not, you walk. In north New Brunswick, I wasn't, so I walked—nine miles. Eventually an Irishman picked me up. I was so tired I could hardly get into the car. "Why nine miles is nothing," he said, "we have men around here who run ten."

The motorist is running a chance. I may rob him. I am running a chance. He may hit a telegraph pole. He may be going 500 yards or 500 miles. One motorist would have taken me to Oregon. Hitch-hiking is cheaper than taking your own car. You don't have the bother of driving—nothing to bother you—often not even a ride.

### The Eating Question

Having eliminated the expense of gasoline, there only remains sleeping and eating. If these two items could be eliminated you could cross the continent without cost.

The Dominion Hotel, Ottawa, Ontario, is a farmer's hotel. Standing behind the market it has one of the few livery stables in the country. They serve green tea, big steaks, and when you are finished, ask if you have had enough. I had been waiting a long time for the question, and I said, "No". Result—more pie and more green tea.

East of Montreal the province of Quebec is French; most of them can speak no English. Now I took French in high school, but there was no attempt to learn to speak it. I got along O.K. until noon. At the cafe they didn't know what I was trying to say. I found out from the next English-speaking person how to say, "I'm hungry," in French.

I reached New Brunswick the day before yesterday, when I saw salt water for the first time. I called at a farmhouse for a drink of water. It was almost six so they gave me something to eat. French clams were a novelty. You open the shell with a knife, scrape the flesh from the shell then swallow it like a raw egg—if you can. Clams are like oysters, only more so! After swallowing several times, I asked the lady if the clam was still alive. When I had struggled with three of them she said, "I'm glad you came along, for they would have been spoiled by morning."

### Quebec City

An afternoon and evening are too short for Quebec. I climbed the citadel for sunset. Several hundred feet beneath, a lazy steamer pushed its way up the St. Lawrence—I watched it pass the landing place of Cartier, and then of Wolfe's army. To the left lay the Plains of Abraham, to the right the walls and fortifications of the French Regime. As the sun set upon the ancient city with its steep narrow streets and cobble-stone pavements, a bugle sounded from a nearby barracks. Out of this fairy land of beauty and old buildings, the bugle recalled the reality of world conditions and modern warfare. That night I took the train for New Brunswick as there is not enough traffic for thumbing. On the train a squadron of Canadian sailors kept most of us awake.

On the same train almost 50 Scandinavian Canadians were on their way to Europe for a holiday. One of them was a Dane who had gone to a Danish Folk School and Agricultural College. He read Shakespeare and Shelly. Such men will make our country great.

### Stranded In Truro

Railway centre, and county town of Colchester, Truro is the seat of the Nova Scotia Agricultural College. Mr. Collins, director of Extension at the college, explained the boys' and girls' work and some farm problems in the province. The farms are small and scattered, often subsidiary to lumbering and fishing. A farmer half lumber-jacket, half fisherman, is seldom as good a farmer as in a thickly settled farm area where great specialization makes for a uniform product as in the Annapolis Apple country. The large rural population with few towns to consume the product, three provincial governments, and high cost of freight to the rest of Canada add to the farmers' problems.

Truro must be Scotch, for I have waited on its outskirts almost six hours for a ride. "Where are you from?" an old fellow asked me.

"Ontario."

"How are you travelling?" "This

way," I said, wriggling my thumb. "Well, if I couldn't travel decent, I wouldn't travel," and he walked off haughtily.

I've been on this corner so long the children all know me by name. To break the monotony I organized foot races among the kids, giving one cent to the winner. But the field day ended when I ran out of money.

The University of St. Francois Xavier is known around the world for its adult education and co-operatives. If I get a ride, I will describe this work in my next letter.

### Inventors Show New Gadgets

#### Interesting Devices Shown At National Inventors Congress

About 500 gadgets, ranging from an improved mousetrap which captures mice by the dozen to a self-navigating diving device, were placed on public view as the annual convention of the National Inventors Congress opened its sessions in New York.

An Albany school teacher, Mrs. Kathryn Miller Coburn, is responsible for the invention of a rotary yarn winder which is designed to "emancipate" the more or less impatient boys and girls who stand with arms outstretched while grandmother does her spinning. Another woman is demonstrating a new cooking utensil which makes it possible to prepare asparagus in an upright position.

The mousetrap, which operates on what its inventor, E. L. Harrison, of Portsmouth, Ohio, terms "the perpetual motion principle," attracted considerable attention. The device lures the mouse through a door by the smell of cheese or bacon. When the door shuts behind it, the mouse, alarmed, runs through a corridor beyond the dangling delicacy as it hunts for a way to escape. The corridor, however, is so wired that it catapults the mouse into an adjacent antechamber, at the same time throwing the entrance open once again for the next victim.

Another device is intended to reveal to farmers which hens are good layers and which are not. Invented by five brothers in Berkeley, Calif., this device has three doors. If a hen lays an egg, the egg rolls down an incline, shutting a side door but opening the front exit for the hen. Thus, a hen which has not laid an egg must leave the trap by a side exit, while the egg-laying hen may be seen leaving by the front door.

A large rubber bag enables bathers and travellers to disrobe in comparative privacy. A person wanting to make a change of apparel can enter the bag, which fastens around the neck, and lay aside garments through apertures for the arms. Another invention designed to add to the comfort of travellers is a sanitary package which is released at the insertion of a small coin. The package contains a small tube of shaving cream, soap, towel, a razor and a powder puff.—New York Times.

### Industry And Agriculture

#### Devote Too Much Attention To Industry And Too Little To Agriculture

Dr. W. A. Riddell, Canadian government delegate to the international labor conference, urged the conference attempt to bring about effective realization of the interdependence of industry and agriculture.

He suggested one of the weaknesses of the international labor office was it devoted too much attention to industry and too little to agriculture.

Since 1935, he proceeded, Canada had continuously endeavored to open up the channels of trade and her customs administration had been greatly liberalized. Beneficial effects of negotiations with a number of countries, including Great Britain and the United States, already were being seen in increased import and export trade.

Dr. Riddell said Canada ranks among the first of tourist countries, with business now amounting to about \$300,000,000 annually, and stands fifth among the trading nations of the world.

### Just The Reverse

Some Chinese laugh at sad music and cry at jazz; shake their own hands when they meet a friend, wear a hat on entering a house, and remove it when leaving; read books backwards by beginning on the last page and finishing on the first; wear white to funerals and in some places the male wears skirts, while the female wears trousers.

## RHEUMATIC PAINS TORTURE!

Don't let rheumatic pains make your life miserable. Poisonous acids from faulty kidney action are probably the cause. Gin Pills drive out these poisons by toning up the kidneys so they can filter the blood properly, "prove their merit through their use!"

## GIN PILLS FOR THE KIDNEYS

## THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VII.—Continued

As I lay stretching myself on the broad of my back after the cozy sleep of the night, the thought of the schoolmaster came to scatter the fairness of the morning. So, with an old broom on my shoulder and much fear and trembling in my heart, I set out bright and early to make a call on Mr. Michael Hughes, the local schoolmaster. With any ugly, hard job on hand, I have always figured that nothing much is gained by just burning up daylight. The ground was frozen hard.

A few years before, the settlers had got together and put up a log schoolhouse on the townline, a tidy step down from the Marshall farm. One foot-loose itinerant after another had turned his hand to school teaching, and earned a few shillings the quarter for each scholar who trudged down to his classes to get a little learning. But bright shillings being a scarce commodity in Mono, the schoolmaster shifted round weekly from family to family, fetching the cream of local gossip with him, and getting bed and board to eke out the trifling cash that came his way. And, at the table, the housewives usually found that the man of letters was a man of parts. The younger children were somewhat regular in their attendance; but, in the late fall and winter time, big clumsy youths as a rule went also to the local school to learn to write and figure. Many of them had hair showing on the face, and the diseases were common among them for which scratching and sulphur are the principal remedies. They came packed with a loutish devilment that sometimes overtaxed the strength and courage of the schoolmaster. One after another the teachers had been beaten up, and had left for other fields of effort.

In the spring of 1846, Michael Hughes had drifted into the township, out of nowhere seemingly, and had tackled the job of teaching the Mono school. His was the tall, lank figure of a man, neither young nor old, but of five and thirty, which is, of course, a sore old age to the mind of any child. His body was as lithe as a gad and as supple as the wind. His features were cleanly chiselled on fine, yet robust lines, and a soft, silken-like beard hid a mouth that was gentle, even to weakness. He thrashed civility under the skins of the big yokels that fall; and so established himself securely as master of the school. Old Hickory Mick earned himself a terrible reputation among the plow boys of Mono as a disciplinarian and wielder of the cane.

The business of boarding around as a nuisance to the farmers' wives did not fit in with his notions of comfortable living; and the master promptly solved the problem by moving into a small log house that had recently been built on a curiously steep breen hard by to the west of the school. There was little household trumpery about, but sufficient for his purpose. The parents of his pupils paid most of the school fees with food and firing. The steepness of his land was such that no plowman has ever turned any of it over. Years after, the little plot was

occupied by Jimmie Buchanan, a cobbler who kept bees; but in the master's time it was covered by a scrubby growth and crowned by a gnarled old thorn-tree. Folk called his place Whistling Hill after Knock-na-feadalea, in County Down. All the children knew the master's was a gentle place, and greatly haunted by the little people. One Hallowe'en night, three separate passers-by saw lights, like tiny risers, dancing on the hillside below his cabin; and there were soft, piping sounds also heard about the place, like the small, thin whistle a drake gives after ducking himself in a pond.

I found the one floor of the schoolmaster's house slightly ajar; and, sticking my head in, I saw the man's back as he stooped over the fireplace, cooking his breakfast in a big black, frying pan. With the broom still clutched in my hands, I stole in, and quietly sat down on a short log. I kept my mouth tight shut to hold my heart from popping out.

In a moment's time, Old Hickory Mick swung around, holding the long-handled spider aloft. He gave his head a startled jerk in the air as he spied me sitting there. He looked like to eat me all up without a grain of salt.

"You little red-headed son of Belial!" he shouted at me, "how dare you set foot in my house without knocking at the door?"

"Oh, sir!" I said, "that's not my name. I'm Paddy Slater, sir; and I've come down," said I, "to look after things at the school, and to rid up your dirty old cabin, sir."

The man froze me with a hard stare.

"By the hole of my coat!" he exclaimed, after thinking the thing over, "Who gave you instructions to come down here?"

"Oh, sir!" said I, "it was Mrs. Marshall, sir! She said I might stay at her place if I'd rid up your dirty old cabin, sir."

There was a pause.

"Are you frightened?" the man asked me, screwing his mouth up with a wry smile.

"Yes, sir," said I, "I'm scared stiff you will beat me with a stick. But she said I was to rid up your dirty old cabin, sir. So I just upped and inned."

"Well, Paddy," the man told me after a further pause, "the Greeks had a brave word for a lad who feared a danger, yet strode out to meet it."

"Yes, sir."

"And speaking of words," he thundered at me, "it's a careless little liar you are to call my house a dirty old cabin!"

"Yes, sir."

"It's not an old, dirty cabin, I'll have you know, because it is only recently built."

"Yes, sir."

"And it is not a dirty cabin, I'll have you know, because it is sweet and clean—though perhaps a trifle untidy."

"Yes, sir," said I.

"And it is not a cabin at all, I'll have you know, because it has boards on the floor."

"Yes, sir," said I.

He shook the pan at me.

"I keep a stick to beat careless, little liars with!"

"Yes, sir," said I.

"And I'll have you know, no person comes into my house like an old sow rooting for swill," he told me. "Get out the door," he ordered me, speaking very stern like, "and come in with your manners on."

So I upped and outed; and then I knocked good and loud on his door.

"Oh! good morning," said the man to me, "I thought you would have run away."

"Good morning, sir," said I, touching my cap, "my name is Paddy Slater, sir; Mrs. Marshall sent me down to do you little services, sir."

"Come in, you unlucky penny," said the master with a little snortly chuckle, "come in; and, in the absence of anything better at hand, sit yourself down on that short log."

"Very kind of Mrs. Marshall, indeed," said he. "She is a very charming lady, indeed, is Mrs. William Marshall."

"Yes, sir," said I. "I'd die for her," said I.

"And perhaps," he continued, "you might like the price of your trouble for coming down so early in the morning. How would you like a taste of these delectable little trout?" he enquired, poking the pan under my nose.

"Oh! sir," said I, "I am a growing boy."

2208

"Very neatly put," the man remarked.

So clearing the corner of the table, Mr. Hughes used a sheet of The Globe newspaper as a cover for two plates.

"Ah! ha!" he told me, "you see how we do things among the hills of Mono."

The globe is as round as a ball, Yet we dine on the Globe In this bachelor's hall.

"Draw to! draw to!" he urged me, "and salt and pepper to your taste and liking."

It was a case of heel, toe, down they go—heads and all.

"If you dine often with me, Paddy Slater, you will soon become a man of parts," the master informed me, "and to start your education, let me instruct you that such speckled beauties as these were first cooked by Venus with her own hands on the hills of Helicon; whence comes the pretty legend that a mess of them works a love charm."

Michael reddened his pipe in the ashes; and the man blew tidy smoke rings as we sat talking and conversing together. It was heart-lifting to Paddy to be sitting there in the company of the great man without a care or trouble in the world.

On a sudden, the master leapt up. "Let us be off on our way to the school in the name of God!" he exclaimed.

And the master and I then set off to fix the fire at the schoolhouse. He was in fine spirits, but was singing a mournful song:

### MY COLLEEN RUE

But drearly and wearily  
The snow is drifting by;  
And dearly and wearily  
It bears my lonely sigh,  
Far from wild Niagara's roar  
To Inny's sparkling wave of blue,  
To the homestead in the fairy glen,  
And gentle Colleen Rue.

He was a spirited man, and as straight as a candle. To keep up with him, I took grown-up strides beside him, thinking I was now myself quite a man entirely.

It was in this wise that I fell in with Old Hickory Mick, and I served the master faithfully for the next five years. I was the only confidant the solitary man had; and he opened his heart and mind freely to me because he knew I liked him. Yet, to the day we buried him at Centreville, his past remained a mystery so far as I was concerned. My own fancy has always been that Michael Hughes had clean forgotten it himself. Everything in his life story stood out sharp and clear back to a jaunting car ride in Dublin town; but at that point the thread of memory seemed to have broken. The man brought a wealth of learning and personality with him from behind that veil of oblivion; but so far as his personal conscious life back behind was concerned, he knew no more about it than does a babe at its mother's breast. After the fat undertaker gets me, I pray, Father in heaven, that, on my awakening, no such loss of memory may be any chance overtake poor, old Paddy Slater. The thought is surely cold comfort to me that my spirit beyond may have perhaps forgotten the poor mortal here below.

Michael Hughes paid me in full the price of all my trouble. The man took many pains to teach me. He may have been an indifferent teacher at times over at the log schoolhouse. The material on which he wrought was often coarse and discouraging. From what I saw of his teaching over there, he did seem at times, however, to have the faculty of arousing the interest and holding the attention of the little children. It is true they got their knowledge in small doses; but there was plenty of pep and dash while he kept them at it. And what he gave them was actually theirs for keeps. At the first sign of listlessness, he promptly bundled the small bodies out to tumble about in the fresh air. In his crude and simple theory, the teacher is wasting his time unless he actually holds the pupil's fixed attention. And, in his opinion, twenty minutes was a long time for a young child or an old man to keep his undivided attention fixed on any one thing. In any event, for the first year, I got my instructions at Whistling Hill and not in the classes at the schoolhouse.

(To Be Continued)

Horticulturists have dreamed of a thornless rose for years, and now it is a reality. Such a rose was raised at Attica, N.Y., recently.

### To Create Better Feeling

#### Breaking Down Of International Prejudices Is A Splendid Thing

America is going English; English is going American. There is a general merging, at least in superficial matters, of two distinct civilizations. It is a splendid thing. In fact from this peculiar phenomenon we may draw a great moral and detect in it the seeds of hope. For such, after all, is the only true internationalism—which must spring from a community of interests and a coincidence of tastes. We understand a fellow who wears clothes like ours and who plays bridge according to the conventions which we observe—we understand him, and he understands us.

We look forward hopefully to a time when this tendency will spread across the world, breaking down even the barriers of language. We look forward to a time when Frenchmen will not longer be "Froggies" to those provincial souls who pass their lives in Surbiton and other London suburbs; a time when Englishmen will not be regarded by the Germans, Swiss, Italians, French and Slavs as wandering dolts incapable of saying more than "Yes", "No", "Thank You", and "Good-bye" in any tongue other than their own; a time when Americans will be recognized throughout Europe as civilized and well-informed persons, and Europeans will be recognized as good sports in all America.

We look forward to a time when we shall be able to encircle the globe without attracting hostility or curiosity, and when even cannibal kings will find a welcome in our homeland.—Hamilton Spectator.

### Children Go Without Books

#### Libraries In Moscow Report Shortage Of Suitable Reading

So acute is the shortage of children's books in Moscow that parents and children actually go to the author's house and ask permission to copy in manuscript some of his works, and other books in his possession.

A popular children's book was published recently in an edition of ten thousand copies. In Moscow Province alone there are 3,115 children's libraries, and Moscow got 400 books for approximately a million children.

The Communist Party newspaper Pravda attacks the book publishing authorities the children's bookshop and the paper industry. "In Moscow," says the newspaper, "in the model shop for children's books, one word is heard from morning till night—'No.'"

"The customer asks 'Have you such and such a book and the answer is no. On April 12 alone one of the girls in the shop—and there are 20 of them—said 'No' 475 times."

The newspaper then states that the Soviet paper industry is handicapping the cultural and literary progress of the country. It cites figures showing "outrageously bad work in the paper factories."

The industry is now 34,000 tons behind the production plan as a result of constant breakdowns of machinery. In some factories bolts and other objects are stated to have been found in the machines.

### Kept Telephone Busy

#### People Excited Over Idea Moon Was Changing Its Position

Astronomers are not like premiers and police chiefs who sometimes have their phones disconnected so they may snatch a little sleep. But the other night Dr. H. Spencer-Jones, British Astronomer General, had to have his telephone removed altogether before he could rest. At a meeting of the board of visitors at Greenwich Observatory he had announced that the moon is moving off its calculated position. It was further off its course, as prescribed by mathematical calculations, than at any time since 1680. When the word got about, half of England wanted Dr. Spencer-Jones' personal assurance something awful was not about to happen. It was explained that the system of mathematics is not sufficiently accurate to calculate exactly the position of the moon in advance. However, it was explained the astronomers could tell where the moon was going to be 20 years ahead within two seconds, which ought to be good enough.

Hairdressing provides employment for 300,000 persons in England.

## HER LIMBS WERE ALMOST CRIPPLED

### Suffered With Sciatica For 25 Years

Those who are subject to sciatica should read this letter from one who suffered for years before she found out how to obtain relief:

"For 25 years I suffered from sciatica in my right side, and I had backaches which forced me to remain in bed for two or three weeks at a time. When I got up in the mornings, my arms and legs used to pain me almost unbearably. One day I heard of Kruschen Salts. I took a bottle of them without feeling much improvement. I tried a second bottle, and that time I felt better. I have kept on taking Kruschen ever since."

—(Mrs.) H.L.  
The pains of sciatica are frequently caused by an excess of uric acid in the body. Two of the ingredients of Kruschen Salts are notable for their work in dissolving uric acid. Other ingredients of these salts assist the internal organs to expel the dissolved acid from the system.

### Little Helps For This Week

The very God of peace sanctify you wholly, and I pray God your whole spirit and soul and body is preserved blameless. Faithful is He that calleth you, who will also do it. 1 Thess. 5:23-24.

Be still my soul, the Lord is on your side;  
Bear patiently the cross of grief and pain;  
Leave to thy God to order and provide,  
In every change He faithful will remain.

It was no relief from temporal ills the apostle promised. The mercy of God might send them to the stake or to the lions, but it was still His mercy if it but kept them unspotted from the world. It might expose them to insult and wrong, still they received it as mercy if it established them in every good word and work. How many of you are content with such faithfulness as this on the part of your heavenly Father, and is this indeed the tone of your prayers?

### Higher Railway Speeds

#### Stream Lining And Diesel Engines Produce New Fast Records

During the past two or three years railway speeds have been increased in all lands, due particularly to stream-lining design and Diesel engines, although some remarkable records, undreamed of a few years ago, have been made by steam locomotives.

The announcement that the Broadway Limited between New York and Chicago will, with a new locomotive now being built, travel at a sustained rate of 100 miles per hour, is not, in the light of modern progress, surprising. The attempt at such an objective was almost inevitable. The present time for the distance by the Pennsylvania Railroad is 16½ hours, under the proposed schedule this would be about nine hours, the distance being 910 miles.

At present the German State Railways hold the first half dozen or more long distance speed records with Diesel trains, the best being between Berlin and Hanover, 158 miles, at an average speed of 82.3 miles an hour.—Stratford Beacon-Herald.

### A Different Fish Story

#### Dead Trout Found In Broken Headlight On Train

Here's a fish story with a brand new twist.

When the streamline train "City of Denver," rolled into Chicago, attendants noted two things: The headlight was broken and, inside the shattered lamp, lay a dead trout.

This explanation was offered: As the train sped eastward from the Mississippi River at 80 miles an hour, an eagle zoomed into its path. It was a head-on collision. The big bird fell. Out of its beak and into the headlight dropped the fish.

### Wheel Of Plane Found

Believed to be part of the aeroplane used by Sir Charles Kingsford-Smith and his co-pilot J. T. Pethybridge on their fatal England-to-Australia flight in November, 1935, an aeroplane wheel with tire and axle was recently found near Moulmein, Burma.

**THIS  
MACHINE IS THE ANSWER  
To Your  
SEEDING AND CULTIVATING  
PROBLEMS**

### CORONATION MODEL

In commemoration of the  
Coronation of His Majesty  
King George the Sixth, the  
Massey-Harris 1937 One-Way  
Disc Seeder has been specially  
finished and painted in the  
distinguishing ceremonial  
colors and will be known as  
"Coronation Model". Place your  
order early with your local  
Massey-Harris Agent for one of these  
distinctive machines.

Experience has shown thousands of Western  
farmers that their Massey-Harris One-Way Discs  
have amply repaid them in better work at less cost.

**For Seeding, Summer Fallow and after  
Harvest Cultivation it has no equal**

The new One-Way Disc and One-Way Disc  
Seeder not only replaces ploughing, cultivating,  
harrowing and seeding by doing the whole job  
in one operation, but has been found the most  
effective means of weed control on summer fallow.  
Not only are the weeds destroyed, but soil blowing  
has been overcome with this machine.

Ask your neighbor about his Massey-Harris One-  
Way Disc. Ask your local Agent about it. He  
can tell you the experiences of those farmers who  
have found the Massey-Harris One-Way Disc  
method of doing their job to be the most effective  
and least costly yet devised.

Truly, as one prominent Western farmer has said,  
"Weeds, Dry Weather, Soil Blowing and High  
Production costs are licked with the Massey-  
Harris One-Way Disc".

## RELY ON U.G.G. TWINE

You can rely on U.G.G. Binder Twine just as you  
can rely on United Grain Growers to give you good  
service. From long experience farmers all over the  
West have learned that U.G.G. Twine is of highest  
quality. The price is the lowest practicable for good  
twine, and twine will be ready for delivery when  
needed.

Let your U.G.G. Agent know now that you want  
U.G.G. Twine so your supply can be ready for you.

### LOCAL & GENERAL

Mr. Pete Booker of Innisfail was  
a Sunday visitor at his home here.

Miss Gladys Geeson is vacation-  
ing this week with friends at Sylvan  
Lake.

Mr. Jim Thompson of Lacombe  
was the guest during this past week  
at the home of Mr. and Mrs. J.  
Boorman.

Mr. and Mrs. H. D. Halliday  
returned Tuesday from Banff where  
they spent their vacation.

Mr. and Mrs. P. E. Lunt and son  
Eddie spent the past week visiting  
at Mrs. Lunt's home in Calgary.

Mr. Frank Farrow of Calgary was  
a weekend guest at the home of  
Mr. and Mrs. Ervea Rodney.

Mr. Allen Kirk of Edmonton was  
the guest of Rev. and Mrs. J. R.  
Geeson during the past week.

Miss Betty Duncan entertained a  
number of girl chums on Monday  
afternoon, it being the occasion of  
her eighth birthday.

Work Clothes and Footwear, all  
lines.—T. E. Scott.

Miss Aleda Huget has recently  
resigned her teaching position at  
Daysland and will remain for some  
while with her parents here.

Mr. Charlie Brown Sr. left on  
Monday for the coast where he will  
spend a month visiting friends and  
relatives at Vancouver and Victoria.

Gerald Boettger, Roman Holub  
and Verne Wrigglesworth left Sun-  
day to holiday at Banff and other  
mountain points.

For best values in Summer Under-  
wear see T. E. Scott. Men's Com-  
binations 75c up

Mr. and Mrs. Dave Edwards and  
family left last Saturday for Sylvan  
Lake where they will enjoy their  
holidays.

Mr. and Mrs. James Clarke were  
renewing old friendships in town  
Saturday enroute to Souris, Man.  
where Mr. Clarke is manager of  
that branch of the Bank of Montreal

Mr. and Mrs. Jack Hislop have  
returned from Australia and taken  
residence in the H. E. Pearson home.  
Mr. Hislop has again been appointed  
agent of the Midland and Pacific  
Elevator at Minaret.

Mr. and Mrs. J. Boorman were  
Lacombe visitors on Sunday. Miss  
Betty returned home after spending  
the week at Lacombe. The twins,  
Mary and Sam remained at Black-  
folds where they will visit with  
relatives.

A very enjoyable afternoon was  
spent at the home of Mr. and Mrs.  
Eric Nelson on Tuesday July 13th  
in honor of their daughter, Enid,  
who celebrated her 13th birthday.  
A softball game was enjoyed, after  
which a dainty lunch was served by  
the ladies.

Westerdale Young Peoples Sports  
Day and Picnic will be held on  
Wednesday July 21st. Baseball  
tournament; Softball; all kinds of  
Sports; 22 rifle show, pillow fights  
etc. Dance at W. D. Ross' barn at  
night.

See T. E. Scott if in need of  
Luggage for your vacation!

"Just-Rite" is the name chosen  
by Mr. and Mrs. A. G. Studer for  
their new cottage at Sylvan Lake.  
Mr. and Mrs. Studer and daughter,  
Miss Wynne Studer, are now at the  
lake where they will remain most of  
the summer. Master Eric Campbell  
is spending July with his grand-  
parents and has as his guest Master  
Charlie Newton.

Didsbury citizens have found a  
new camping place to spend their  
weekends. Mr. and Mrs. N. S.  
Clarke, Mr. and Mrs. W. J. McCoy,  
Mrs. Alexander of Calgary, Mrs.  
E. G. Ranton, Miss Minnie McNeil  
and Miss Jessie McCoy and Mr.  
Ralph Hansen all camped out at the  
Bergen bridge Saturday night. They  
were joined on Sunday by Mr. Ran-  
ton, Miss Dorothy, Bill Ranton and  
Bennie Wyman. The party had a  
very enjoyable trip with Bill McCoy  
having the honor of catching the  
lone fish. You tell them about it,  
Bill!

A line of Men's Fine Kid Oxfords  
with built-in arch supports, only  
\$4.95.—T. E. Scott.

Heroic Dramatic and Romantic  
is "The Texas Rangers," the fea-  
ture at the Opera House this week-  
end. A stirring saga of the south-  
west, starring Fred MacMurray,  
Jack Oakie and Jean Parker.

A tire blowout was the direct  
cause of deaths by drowning of Ed-  
ward Wales of Auburndale, Mass.,  
his wife and two of his three daugh-  
ters in the irrigation canal immedi-  
ately outside the eastern boundary  
of Calgary last Thursday morning.  
That was the decision reached by  
the coroner's jury on Tuesday.

In submitting its decision the jury  
declared a blowout in the left front  
tire caused Mr. Wales to lose con-  
trol of his car, with the result that  
it left the road, crashed through the  
double fence on the bridge over the  
canal and plunged it into 15 feet of  
water.

### WEDDINGS

HALVORSON—McCONNELL

A quiet but pretty wedding occur-  
ed July 8th, 1937, at the home of  
the bridegroom in Bergen, when  
Miss Irene McConnell of Calgary  
became the bride of Mr. Trygve  
Halvorson of Bergen, Alberta.

The bride entered the room on  
the arm of her uncle, Mr. Tedford.  
Miss Minnie Halvorson attended the  
bride as bridesmaid. The bride was  
also accompanied by two little flower  
girls, nieces of the groom. Mr.  
Halvorson was attended by his bro-  
ther, Edwin Halvorson.

The wedding ceremony was per-  
formed by Rev. Oscar Snyder,  
assisted by Rev. E. Archer of Ber-  
gen.

After the brief ceremony the  
bridal party and guests were served  
with a dainty buffet lunch.

We wish this happy couple much  
joy and happiness as they reside on  
their farm west of Bergen.

### DIED

Audrey Eileen Habermehl died  
at the Olds hospital July 7th at the  
age of one year and 27 days.

She leaves to mourn her loss a  
father and mother, Mr. and Mrs.  
William Habermehl of east of Olds  
and a little sister, Evelyn. A num-  
ber of near relatives also mourn her  
passing.

The funeral took place from the  
Durrer Funeral Home Friday, July  
9th at 2 p.m. Rev. Oscar Snyder  
had charge of the service. Inter-  
ment was made in the Zion Mennon-  
ite Cemetery, Waterloo.
